PROFILE

Results-driven Full-Stack Developer with proven expertise in architecting and delivering scalable solutions across diverse technology stacks and industry verticals. Experienced in building high-impact applications serving 20,000+ combined active users, from real-time messaging systems and IoT vehicle management to conversational AI and Web3 innovations.

Demonstrated proficiency in end-to-end development using modern frameworks including .NET MAUI, React.js, Next.js, Node.js, and Python, with specialized experience in database architecture (MongoDB), real-time communication (Aby, Socket Programming), and emerging technologies (Web3, NFT, Blockchain).

Proven track record of establishing strategic partnerships, implementing enterprise-grade backup solutions following industry standards, and developing custom IoT control systems for hardware integration.

Strong background in cross-platform mobile development, dashboard creation, and API integration, with experience managing projects from proof-of-concept to production deployment. Skilled in building role-based systems, implementing automated workflows, and creating seamless user experiences that drive operational efficiency and business growth.

Core Competencies: Full-Stack Development • Mobile Applications • IoT Integration • Real-Time Systems • Database Management • Web3/Blockchain • Conversational AI • API Development • Socket Programming • Enterprise Architecture

PROFESSIONAL EXPERIENCE

Software Developer, *Blackwater Tech East*

01/2025

Pet Services Management Platform

- **Architected and developed** a comprehensive dual-mobile application ecosystem from scratch for pet services management, serving both customer-facing booking operations and internal company workflows
- **Implemented real-time messaging system** enabling seamless communication between clients, company representatives, and internal team members using Aby integration
- **Built robust administrative dashboard** for user management, scheduling optimization (bus pickup/dropoff coordination), and fleet management with dynamic vehicle addition capabilities
- **Engineered enterprise-grade database backup solution** following industry-standard 3-2-1 backup methodology with point-in-time restoration functionality for system administrators
- **Technology Stack:** .NET MAUI, MongoDB, Next.js, Node.js, Express.js, Aby
- **Impact:** Streamlined pet service operations and enhanced customer communication workflows

Education Management System

- **Developed and deployed** a comprehensive examination management dashboard serving 2,000+ active users in the education sector
- **Implemented role-based access control system** ensuring secure multi-tier user permissions and data integrity
- **Created seamless file management workflow** enabling administrators to upload examination materials and students to access downloadable content

- **Built integrated scoring and analytics system** providing real-time exam results and performance tracking for students
- **Technology Stack:** React.js
- **Impact:** Digitized examination processes for 2,000+ users, improving administrative efficiency and student experience

Svelte JS Developer, Blackwater Tech East

10/2023 – 12/2024

Vehicle Wizard Dashboard

Hyderabad, India

- **Architected and developed** a comprehensive vehicle management dashboard from scratch, currently serving 1,500+ active users
- **Built intuitive user interface** for fleet tracking, maintenance scheduling, and operational analytics
- **Technology Stack:** React Ts
- **Impact:** Streamlined vehicle operations for 1,500+ users, improving fleet management efficiency

Parts Silver Platform

- **Developed enterprise-grade parts management dashboard** supporting 2,000+ active users with advanced inventory tracking capabilities
- **Integrated barcode/QR scanner functionality** enabling real-time parts identification and inventory updates
- **Built comprehensive search and filtering system** for efficient parts catalog navigation
- **Implemented automated inventory alerts** and low-stock notifications for proactive management
- **Technology Stack:** React Js
- **Impact:** Optimized parts management workflows for 2,000+ users with integrated scanning capabilities

Frontend Developer, lotracx private limited

08/2021 – 08/2023

Led diverse technology initiatives spanning web development, food delivery automation, conversational AI, Web3/NFT solutions, and IoT vehicle control systems. Enhanced company's technological infrastructure while driving innovation across multiple industry verticals and emerging technologies.

Manipal, India

Flocco - WhatsApp Chatbot Platform

- **Developed and deployed** intelligent chatbot system with seamless WhatsApp integration, currently serving 5,000+ active users
- **Built conversational AI workflows** for automated customer service, order processing, and user engagement
- **Implemented robust messaging API integration** ensuring reliable real-time communication and response handling
- **Created scalable backend architecture** supporting high-volume concurrent conversations
- **Technology Stack:** [Specify technologies used]
- **Impact:** Automated customer interactions for 5,000+ users, significantly reducing manual support overhead

Mouvit - Vehicle Ordering Platform

- **Architected comprehensive vehicle ordering ecosystem** supporting 1,000+ monthly vehicle orders with 10,000+ registered user base
- **Established strategic partnership integration** with CAMACO for expanded service capabilities
- **Built scalable order management system** with real-time inventory tracking and automated dispatch workflows
- **Implemented user-friendly booking interface** with advanced filtering and scheduling capabilities

- **Technology Stack:** [Specify technologies used]
- **Impact:** Facilitated 1,000+ vehicle orders for 10,000+ users while securing key industry partnerships

Radboards - IoT Vehicle Management System

- **Developed IoT-enabled vehicle tracking solution** managing 100+ vehicles in rental model operations
- **Implemented large-scale IoT deployment** enabling 3,000+ vehicles with location tracking capabilities over 12 months
- **Built real-time monitoring dashboard** for fleet management, utilization analytics, and maintenance scheduling
- **Created automated reporting system** for operational insights and performance metrics

- **Technology Stack:** [Specify technologies used]

- **Impact:** IoT-enabled 3,000+ vehicles annually, optimizing 100+ rental fleet operations

Shockwave - Electric Scooter Control System

- **Engineered custom UI and socket server architecture** for electric scooter fleet management using Python
- **Developed real-time vehicle control interface** enabling remote scooter operations and monitoring
- **Implemented secure socket communication protocols** for reliable vehicle-to-server connectivity
- **Built comprehensive rental management system** with booking, payment, and usage tracking
- **Technology Stack:** Python, Socket Programming, [Additional technologies]
- **Impact:** Facilitated 25+ monthly scooter rentals through custom-developed control infrastructure

Web3 & NFT Innovation Projects

- **Created proof-of-concept applications** exploring blockchain integration and NFT marketplace functionality
- **Developed smart contract interfaces** and Web3 wallet connectivity solutions
- **Built prototype NFT minting and trading platforms** demonstrating emerging technology capabilities
- **Researched and implemented** decentralized application (dApp) architectures
- **Technology Stack:** [Web3 technologies used]
- **Impact:** Established company's capabilities in emerging blockchain and NFT technologies

Food Delivery Service Manager

- **Developed automated service management system** streamlining food delivery operations and order processing
- **Implemented intelligent routing algorithms** for optimized delivery scheduling and resource allocation
- **Built comprehensive admin dashboard** for order tracking, delivery management, and performance analytics
- **Technology Stack:** [Specify technologies used]
- **Impact:** Streamlined food delivery operations with automated service management

Software Development Intern, Hexagon Global It Services Private Limited

01/2021 – 07/2021

I was responsible for developing a website for one of their construction projects.

Bangalore, India

This involved designing a system that captured the entire flow of the building construction process, including bill generation and a 3D model view of the progress. Through my work, I contributed to the company's goal of streamlining construction processes and increasing efficiency in project management.

EDUCATION

Post Graduate Program in Cyber Security, Great lakes University

Udupi, India

This is a degree offered by the Great lakes university.

Bachelor of Computer Applications, Mahatma Gandhi memorial college Udupi

Manipal, India

This is a fulltime course offered by the Mangalore University.

Master of Computer Applications, Manipal Institute Of Technology

Manipal, India

This is fulltime course offered by the Manipal University.

SKILLS

React JS**React Native****Svelte JS****Node JS****Express JS****Python****Solidity**

Solidity is an object-oriented programming language for implementing smart contracts on various blockchain platforms, most notably, Ethereum

Hardhat

- Hardhat is a development environment for Ethereum software

Figma**Web3**

Web3 is an idea for a new iteration of the World Wide Web which incorporates concepts such as decentralization, blockchain technologies, and token-based economics

Web Designing**HTML5****Bootstrap 5.0****Adobe XD****.Net MAUI****Next JS****CSS 3****Tailwind 3.4.13****LANGUAGES**

• English

• Hindi

• Kannada

INTERESTS

• Cybersecurity

• Blockchains

• Web3

• Internet of Things

• Arduino

• Raspberry Pi

• Designing Websites and Apps

ORGANIZATIONS

Sri Sathya Sai Seva Samithi is a philanthropic organization dedicated to serving humanity and upholding the teachings and ideals of Sri Sathya Sai Baba. Founded on the principles of love, selfless service, and spiritual upliftment, the organization operates globally, engaging in various service activities to help the needy and underprivileged. Sri Sathya Sai Seva Samithi actively involves volunteers who selflessly contribute their time, skills, and resources to carry out initiatives in the areas of education, healthcare, rural development, and disaster relief

Present
Udupi, India

PROJECTS

ERC20 Token Generator, <i>A ERC20 Smart Contract designed to mint custom ERC20 tokens on a polygon/Ethereum test net The UI is developed in Svelte using ethers and web3.js. This project also uses MetaMask a web3 wallet provider to emulate the minting and storing of the generate/ minted tokens.</i>	2024 – 11/2024
Outcomes • Web3 enthusiasts can play around and generate their own ERC20 tokens for testing purposes	
WhatsApp-Integrated Chatbot for Company Information and Order Placement, <i>A chatbot designed using node.js, mongo dB, python 3, nltk, TensorFlow to be integrated with WhatsApp</i>	09/2022 – 2022
Outcomes • Potential client can communicate with the chatbot to know more about the company and also be able place orders	
E Commerce Site, <i>An E-Commerce website developed using HTML5, CSS, Bootstrap for a client who was planning to sell goods online.</i>	11/2020
Used HTML, CSS, Bootstrap, C#.Net and SQL	
Outcomes • Able to list all the goods online and view or edit them if needed • Clients are able to purchase the goods and transfer the funds to the Business	
Face Recognition System using Python, <i>A simple Face-Recognition System constructed using Python 3.7 and Open-CV</i>	05/2020
Outcomes • To detect face of the person • To identify the person	
Intelligent Braking System (Arduino project), <i>An IoT project which detects obstacles in front of a moving car and applies brake by calculating the distance between the object and the car and prevents the car from colliding onto the object.</i>	09/2019
Automation System for Hi Tech Home World., <i>Billing and Automation System Developed as a BCA project for A client.</i>	04/2019
Used C#.Net and SQL database.	

CERTIFICATES

- Python for Absolute Beginners
- Post Graduate Program in Cyber Security
- Bootstrap & jQuery Certification Course for Beginners
- Application Security Vulnerability Assessments (SFNOS 909)
- MTA: INTRODUCTION TO PROGRAMMING USING PYTHON CERTIFIED 2020
